SYNOPSIS OF THE PROJECT

Roll No &Name	56 Harsha S Pillai
Name of Guide	Ms Manju Joy
Contact Number:	9072431712
Email id"	harshaspillai1451999@gmail.com
Shared folder/git repository details	https://github.com/Harsha-1-pillai/MAIN_PROJECT.git
Project Title	Pill Notify

Description of Project:

This project is an android application meant to aid the forgetful and busy with remembering to take their daily medications. It focuses mainly on old people who need a little help keeping track of their medication schedule. The application allows the user to store pill objects, multiple alarms for those pills and also to store the prescription. The user is able to view their pills in a today view and can select date to view medicines. In addition, the application stores the history of when each medication was taken. This will aid the user in keeping track of their medication usage.
And also no internet is required here, offline storage of database helps in faster read write operations. Medicine timings of multiple users can be stored in the same app in same smartphone. Quantities of medicine can also be stored so that one can know, how many tablets or medicines he/she has to take.

Front end and Backend Tools	Android studio IDE
	Java
	SQLite Database
	XML
